Measurement Systems

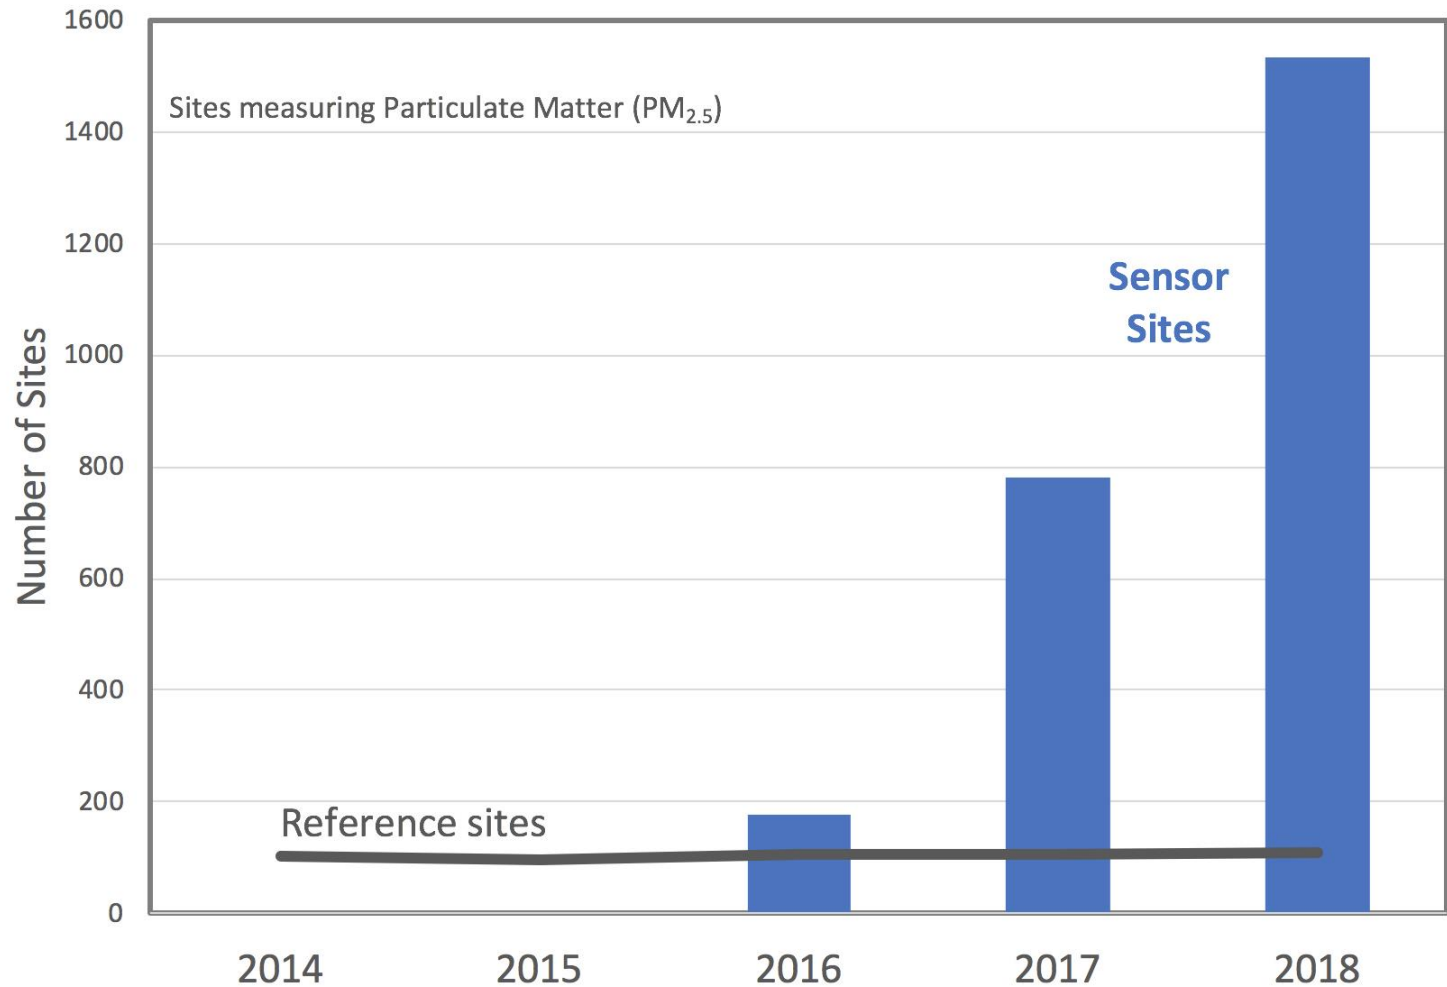

Reference

Portable ("mid-cost")

Sensors ("low-cost")

Growth of Sensors Outpaces Reference Sites

Sensors include Aeroqual, AirBeam, Clarity, PurpleAir, and Safecast PM_{2.5} sensor systems - August 2018
Reference stations include permanent sites run by local air districts and the California Air Resources Board

www.TDenviro.com

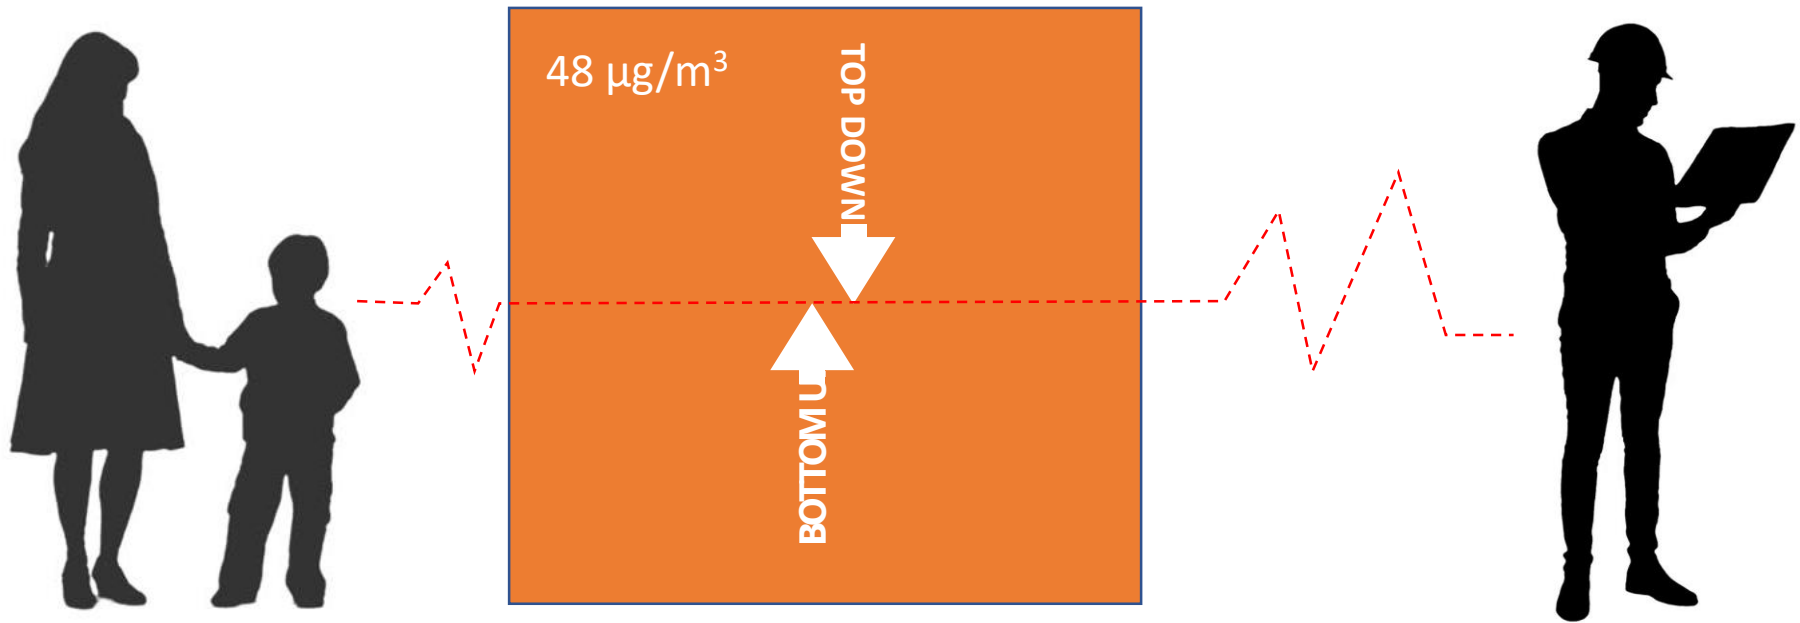

Messy Air Sensor Data

Metric	Reference	Sensors
Parameters(s)	Few	Multiple; not uniform
Coordinates Date Time Location Conventions	Some problems	Not always clear Not always labeled
Metadata	Available - updated?	Often lacking
Number (worldwide)	10,000 (slowly growing)	100,000 (rapidly growing)

“Too”s and “Not”s

- Too many sites
- Too few sites
- Too uncertain
- Too stationary
- Not representative
- Not long-term
- Not useful
- Not profitable
- Not wanted

Perspective

“My sensor instantly tells me what’s happening outside my house.”

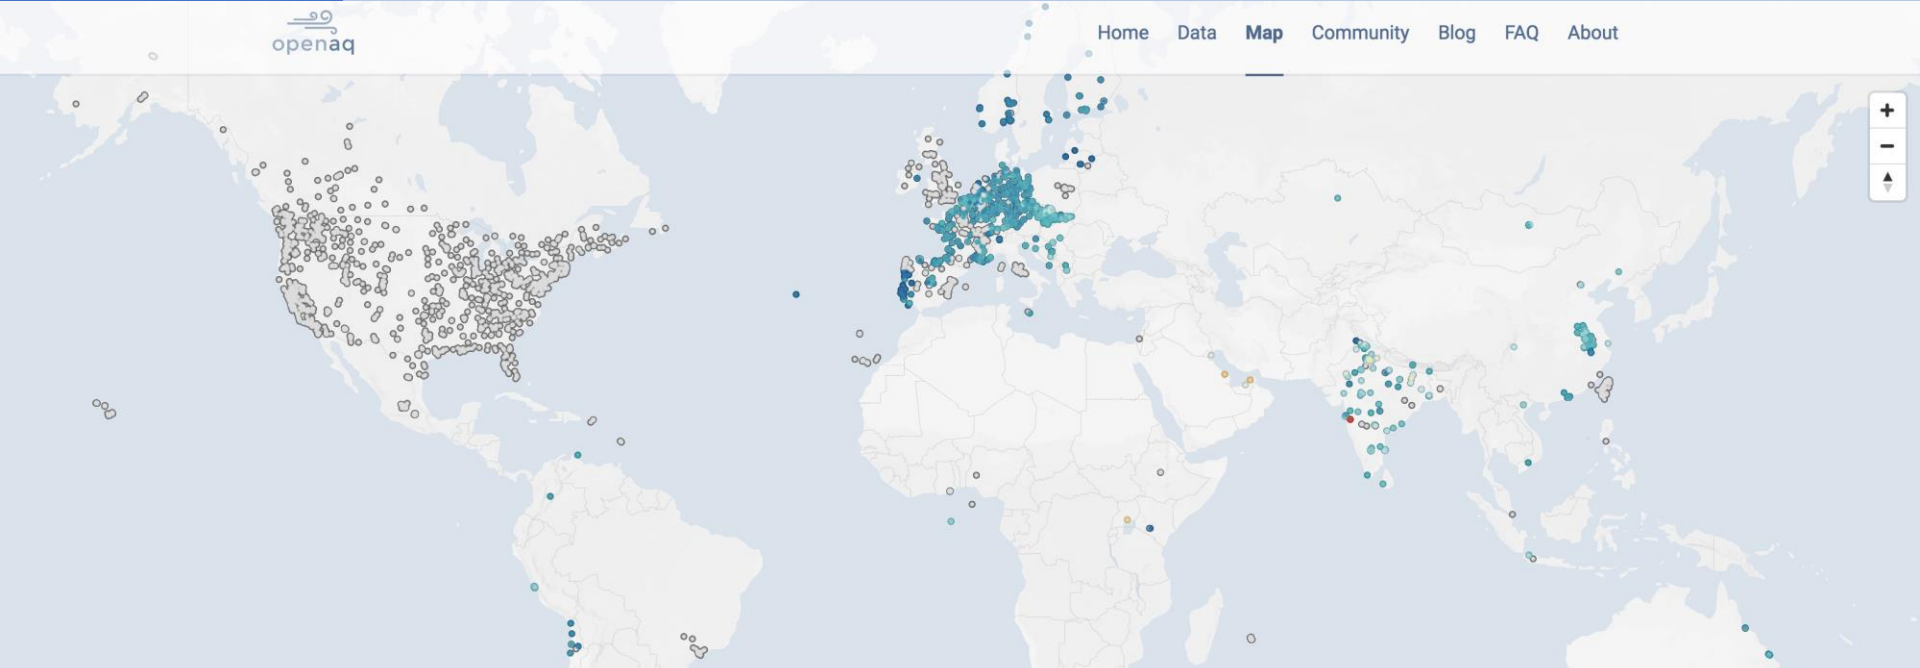

“Are these sensors accurate to monitor smoke from fires?”

Open AirCasting

The screenshot displays the AirCasting.org interface. The main map shows a green and yellow path of sensor locations in Ulaanbaatar, Mongolia, with various landmarks like the National Museum of Mongolian History and Sukhbaatar Square. The left sidebar contains navigation links (HOME, ABOUT, MAPS, BLOG, DONATE) and a list of sessions. The bottom left features a 'Sessions Graph' showing a heatmap of sensor activity over time, with a specific data point highlighted: '06/19/2018 19:49:24-19:49:26 Particulate Matter = 38 µg/m³'. The right sidebar contains search and filter options for parameters, locations, and profile names. The top of the browser shows the URL and search results.

THE OPENAIR PROJECT » HOME

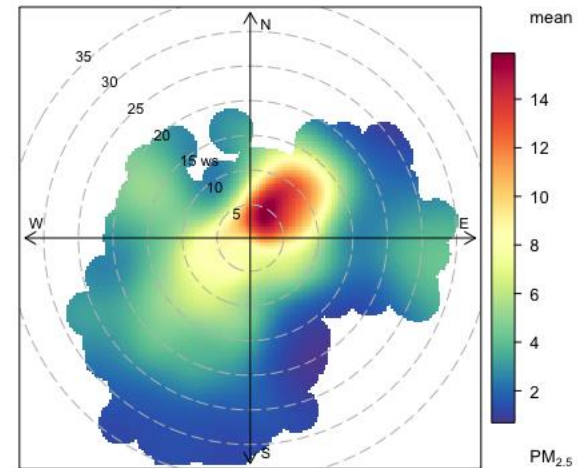

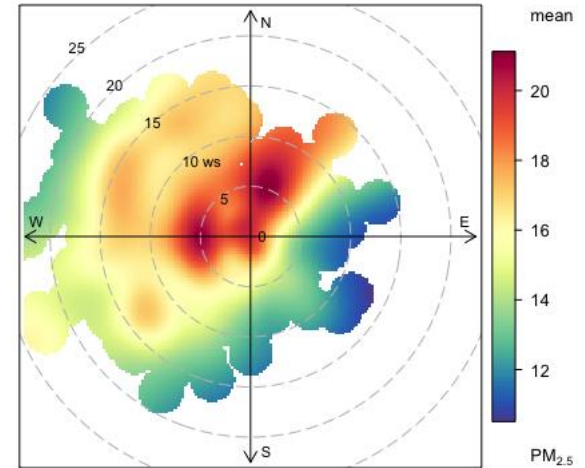

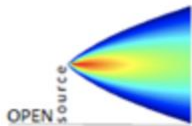

openair - open-source tools for air pollution data analysis

The **openair project** was a Natural Environment Research Council (NERC) funded project to provide a collection of open-source tools for the analysis of air pollution data. For background information to the project. The project website is <http://davidcarslaw.github.io/openair/>

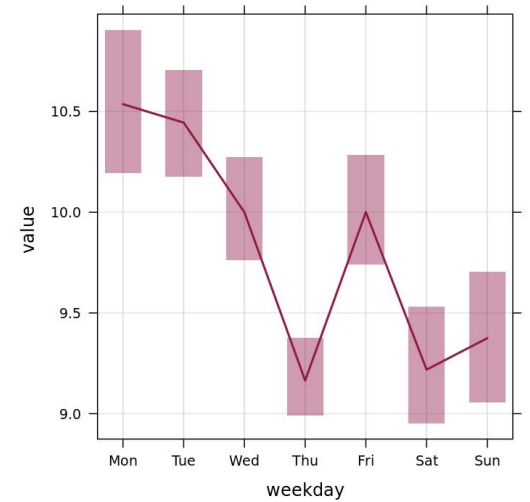

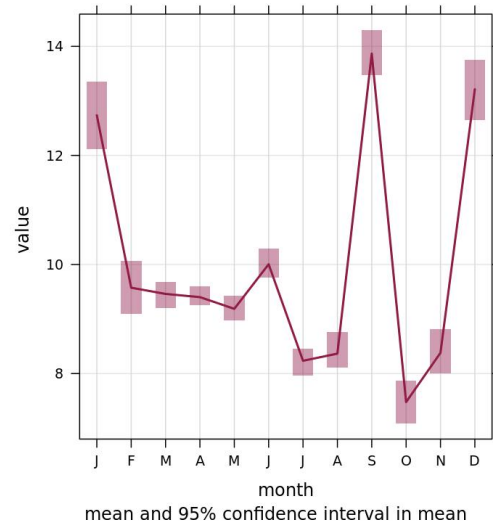

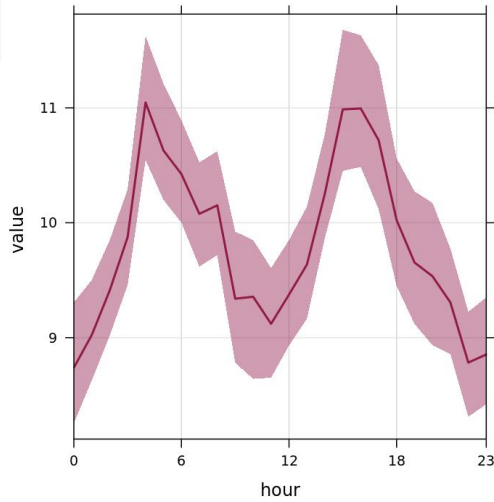

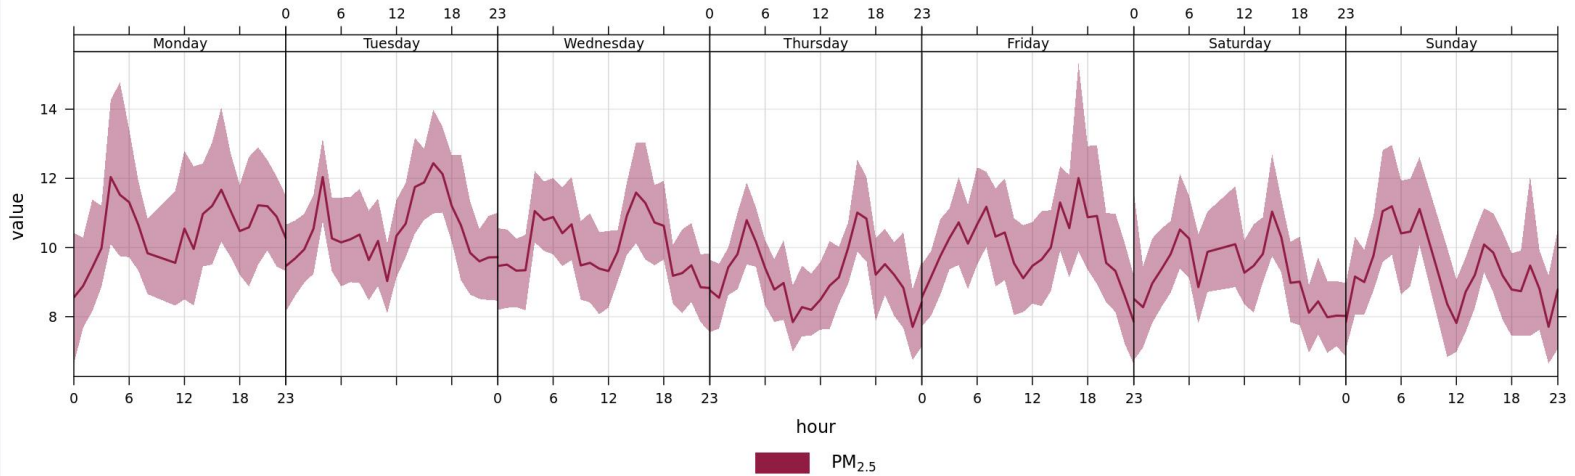

The project was led by the Environmental Research Group at the University of Leeds and is now hosted at King's College London.

<http://davidcarslaw.github.io/openair/>
