

# Air Sensors International Conference

*Advancing Science and Engaging Communities*

Oakland Convention Center, California | September 12-14, 2018

## Welcome to ASIC

You are cordially invited to join us at the first Air Sensors International Conference of the University of California, Davis, Air Quality Research Center (AQRC). The AQRC is partnering with the United States Environmental Protection Agency, the California Air Resources Board, the South Coast Air Quality Management District and the National Institution for Environmental Health Sciences to bring you five days of education and discussion in Oakland, California on air quality sensors.

ASIC exemplifies its theme of “Advancing Science and Engaging Communities” by bringing together top scientists and researchers, community members and citizen scientists, government regulators and industry members from around the globe to discuss the latest research and advances in air sensor technology and data in order to better tackle the environmental problems we face. Consistent with our theme we have arranged plenary keynotes from the leading industrial, academic and community groups to share their cutting-edge work.

We welcome participation from people engaged in many fields of enquiry in search of a better understanding of how air quality and the communities and governments interact and how to devise better technology to increase our understanding.

We are pleased to have you attend this year’s conference and appreciate the effort you must undertake to secure funding and travel visas. Please note that this invitation for participation does not, in any way, financially oblige UC Davis or ASIC for the expenses you incur for travel and conference attendance, and all conference participants are expected to pay the registration fees according with conference policy.

I am certain that by attending ASIC you would learn a lot about new approaches and methods and have a unique opportunity to exchange ideas and discuss your work with other researchers to better understand air sensor technology and implementation. You can view more information on the conference on our website: [asic.aqrc.ucdavis.edu](http://asic.aqrc.ucdavis.edu).

Please do not hesitate to contact me if I can be of any assistance in helping you.

Sincerely,

*Sandra Hall*
